

## Parco Archeologico di Segesta

A visit to the **Archaeological Park of Segesta** allows you to admire the vestiges of an ancient **Elymian city**, an indigenous population that sources claim descended from the Trojans, perpetually in conflict with the Greek Selinunte.

You will visit the splendid **Doric Temple** in all its beauty and the **Hellenistic Theater** considered one of the most beautiful of the classical period, both for its excellent state of conservation and for its spectacular position on the Gulf of Castellammare.
